<p>If yes, give a brief description and a list of modules currently operational (maximum 500 words)</p>	<p>Module 1: Student online admission Portal. Link http://mitaoe.edu.in/sms/ The online admission system integrates technology with the administrative/education process and is beneficial for both the institution and the students alike. It acts as a new achievement factor in addition to traditional sources of advantages. The goal of Online Admission System is to computerize the admission management system structure, its related operations and functionality to rectify these weaknesses. Also, the purpose is to provide support to the administration and admission seeking candidates by providing a faster, transparent, and easy way of maintaining records and utilize them for reference and further proceedings.</p> <p>Module 2:: Human Resource Management System Link http://mitaoe.edu.in/hrms/ The function of the human resources department involves tracking employee histories, skills, abilities, salaries and accomplishments. Replacing certain processes with various levels of HRMS systems can distribute information management responsibilities so that the bulk of information gathering is not delegated strictly to HR. By allowing employees to update personal information and perform other tasks, information is kept more accurate and HR professionals are not bogged down.</p> <p>Module 2: HRMS Leave Management (Testing Phase in progress) Opportune HRMS Leave Management platform ensures corporate HR to set up a fair employeefriendly leave policy. • Define Leave types • Create your HR Leave policy • Leave balance computation • Employee View • Transparent Approach • Leave reports Alerts • Report generation</p> <p>Module 2: Online Attendance System Online attendance management system automates the process of student attendance. Attendance system computerizes the following: • Academic calendar • Course (subject) allotment • Time table entry • Creation of practical batches • Day to Day attendance entry by the faculty Online Attendance Management System is an</p>

Feedback Obtained

Feedback is a vital part of any institute's skill set. Constructive feedback is a robust tool for creating a healthy environment, boosting productivity and engagement, and achieving better results. It plays a crucial role in education and learning by helping adopt new knowledge sooner and avoid repetitive mistakes. The feedback, positively influences on communication, faculty members' interaction and teamwork results. MIT Academy of Engineering has been continuously taking the feedback from all the stakeholders to improve its teaching learning methodologies. The feedback obtained from all the stakeholders is being analysed and utilized for the overall development of the institute. Feedback on other than academic factors is taken on various factors such as teaching of the faulty, extracurricular and cocurricular activities, infrastructural facilities, various club activities, support for technical and nontechnical events and campus life. The students' responses regarding the above stated areas are collected through online survey. It is analysed as per the ratings received from the students. The feedback is discussed and analysed in the various committees such as College development Committee, Academic Council and Governing Council. Further, the comments and suggestions received from these committees are considered for the overall development. In this way, the student satisfaction is improved as it is the ultimate goal of feedback. One of the important stakeholders of any educational organization is a teacher. The teachers' responses regarding the overall development of the functionality of the institute is accumulated by conducting the online survey. As mentioned above, it remains opened for the discussion in the various committees. The Placement office regularly collects feedback from all the companies visiting for campus recruitment. The feedback is collected on a specified format at the end of the selection process, mainly on the students performance in the following areas: 1. Understanding of the core subjects and their application 2. Understanding of new technologies 3. Core areas in which our students have performed well 4. Communication Skills, Attitude Behavior The overall feedback is also collected on the Institute / Curriculum / Teaching Methodology, etc. The received feedback and suggestions from the employers helps us improve our processes and create a pool of job ready talent as per industry requirement. Alumni feedback helps in focusing the latest technology adopted by the industry. The alumnus feedback on overall quality improvement is taken. It is always used to bridge the gap between academia and industries and skill development. The suggestions provided on the improvement of the curriculum are incorporated in the curriculum development process. The Infrastructure development suggestions are being forwarded to the management for the further actions. The institute also organizes Parent Teacher meet once in an academic year. The feedback from parents is collected during the meet. Moreover, the feedback is taken when a parent visits the campus for one to one discussion. The parameters that are considered for the feedback are Vision and Mission, Objective and Outcomes, Curriculum, Teaching Learning Process, Faculty and Staff, Academic Facilities, Administrative Facilities, Placement and overall

impression.

The first year administration office creates the database of all the first year engineering students and the students are bifurcated in eight divisions. Each division is further divided into batches. Each division is assigned with a class teacher and there are mentors allocated to each batch. The following tasks are assigned to the mentors. 1. Get the details of the students like complete name, official email address, roll number from the first year office. 2. Meet the students in person. Talk to them and ask them to prepare a document file. The file should include their personal information form, a passport size photograph, contact details, educational details and so on. 3. The students are informed to include supportive documents and

submit the file to the mentor. The mentor further asks the students to meet during office hours. 4. The office hours are allocated in the time table and the students need to meet the mentor during the same. The mentoring system is designed right from the first year and it continues till they graduate. The students meet their mentors each week and discuss their issues, technical difficulties, etc. The mentor maintains the minutes of the meetings and he can take necessary actions if required. The following are the activities mentor performs. 1. Maintains a complete database of the student of the allocated batch. 2. Meeting the students (his mentees) once in a week and find out their difficulties. 3. He can counsel the students during the meeting. 4. The mentor maintains the record of the student attendance and discusses with the students whose attendance is not up to the mark. He further talks to the parents of the student, if necessary. 5. He informs the achievements of the students to the Class teacher / Coordinator. The achievements can be participation in an event, winning prizes, excellent work at any technical event and so on. 6. The mentor addresses grievances of students and informs parents regarding their attendance and Academic performance. To facilitate all the R D activities in our institute among students and faculty/staff members, the R D cell is functional and is being steered by the Director, Dean (RD) and active representatives from each department. A unique incentive increment scheme was introduced in 2008 for encouraging and boosting RD culture in the institute. Institute arranges several workshops to develop research paper/proposal writing and patent drafting skills amongst faculty and students. MIT AOE endeavors in collaborative research with esteem research organization and industry. MIT AOE in the years had developed the ecosystem for conducting quality research. Also college is giving the Seed Money for completing the research project.

Library, ICT and Physical Infrastructure / Instrumentation

The Central Library follows the SLIM 21 library management software that carries out daytoday activities and we also purchase an upgraded version of the software annually. The barcode facility is available for book circulation. The Central Library is an ISO 9001: 2015 certified, which in itself shows the quality of the library. We conduct library committee meetings, library staff meetings and also take feedback from students for the continuous improvement of the library. We provide ICT based services like an email reminder, SMS, selfrenewal of books, webOPAC, digital library, article indexing and abstracting, access to ejournals, etc. to the users.

Human Resource Management

HRM plays a key role in acquiring and retaining high quality teachers. To publicize the job openings, newspapers, walkins and institute website are the sources. A candidate can explore about the institute and job description from the website. HR also takes additional

efforts to contact TP cell of reputed institutes like IITs and NITs to get the resume for the further recruitment process, especially Ph.D. candidates. To retain the faculty, the institute is having policies and best practices for their welfare. Institute conducts faculty induction program on teaching pedagogy.

Industry Interaction / Collaboration

Corporate Relations office has the mandate to work hand in hand with industry that works in the space related to engineering solutions. In conjunction with MITAoE academic leaders, it remains the primary vehicle for outreach and strategic engagement for projects, internships, placement, entrepreneurship and guest sessions. Corporate with a strong engineering discipline focus and desire to develop a mutually beneficial relationship with MITAOE will have multiple opportunities to engage students. CR office keeps a watch on the industry trends to know the career landscape and make careful informed employment decisions. It ensures that students are regularly coached on various career options. Also six months credit based internship is a part of curriculum.

Admission of Students

The admission is done by the component authority i.e Admission Regulating Authority, once the allotment is done, we follow the following procedure. All the eligible students have to fill the online form on the 'dte.org.in web portal and scan the relevant documents. After filling the form the students have to take 2 prints out and visit the Facilitation Centre allotted by Directorate of Technical Education (DTE). Along with the form they have to carry the attested copies of all their original documents.

Curriculum Development

Academic Autonomy has opened the doors for excellence in Education, Research and Administration through updated and contemporary syllabus for all programmes offered. The curriculum includes a holistic approach and courses like Design Thinking, System Engineering, Prototyping, Engineering Tools and Techniques and extensive projectbased learning. Besides, • Exposure to international languages like German and Japanese • Communication and Soft Skill Courses is

included. • Entrepreneurship courses are offered. • Swayam Course on Project Management is offered. • The creditbased internship is offered • Major, Minor Courses and Skillbased courses. • Add on modules related to industry requirements started to enhance placements.

Teaching and Learning

The Institute has made its mark by excelling in academics and it continues to grow as a Centre of Excellence in engineering education and research. Innovative approaches to teaching and learning such as activitybased, problembased, projectbased and skillbased learning approaches are undertaken. MIT AOE strives to continually evolve and use innovative information and communication technologies and diverse set of technological tools and resources such as Moodle, Google classroom, etc. to communicate, create, disseminate and manage knowledge. The entire teachinglearning process is ISO certified. Innovative in course, end course, internal assessment and evaluation using state of the art tools and techniques.

6.2.2 – Implementation of e-governance in areas of operations:

Administration	<ul style="list-style-type: none"> • Biometric attendance system for monitoring the attendance of the employee • Learning management system for tracking the teachinglearning activity. • Online admission system portal • HRMS portal is in process
Finance and Accounts	<p>We use Tally Software ERP9.0 for Accounting purpose. All the payments mostly made through the NEFT/RTGS/Bank Transfer. The receipt transactions are also accepted through NEFT/RTGS/Bank Transfer. We are using Relyons Saral Payback software for Salary processing and also for filing quarterly Income Tax Return of salary i.e. Form24 and generation of Form16 of all faculty and staff. We also use Student Management System i.e. ERP software for generating students fees receipts and students fees outstanding list.</p>

Examination

- Open book examinations for few subjects at Undergraduate level
- Complete transparency in assessment and evaluation - every student views his assessed answer scripts and has the right to get each answer script reevaluated. The internal assessment marks allotted by the course faculty is also shown to students at every stage of continuous assessment.
- The answer script is assessed by the course faculty and then moderated by another faculty to ensure errorfree assessment.
- Reexamination for every course conducted within ten days of declaration of result All results declared within ten days of the conclusion of examinations

Planning and Development

The Digital Day is conducted once in a semester for all the students through go to webinar tool, having Google suit application for mitaoe.ac.in domain for all the stakeholder for digital communication, Installed Digital Notice board for dissemination notices and news besides SMS system for notification Installed solar system,

biogas plant for renewable energy, and Energy Meter for Solar system.

7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Best practices are used to maintain quality as an alternative to mandatory legislated standards and can be based on selfassessment or benchmarking. Best practice is a feature of accredited institute like MIT AOE. The following are some of the best practices of the institute. ? Good Teaching Learning Process. ? 360 degree feedback system which involves all the stakeholders ? Financial Support for Professional body membership, attending National and International Conferences / Workshops / FDP etc. ? Appreciation for employee for extra achievements in academics / student activity / nonacademic activities / Extra cocurricular activities ? Teacher of the Year and Staff of the Year Award, Teacher of the Department award ? Felicitation and Appreciation of employees who complete 10 years' service ? Group Health Insurance policy for Employee ? Best outgoing student award "MAEstro" for final year ? Allrounder student Award for final year student ? The most promising student award for first year student At the core of all MIT Academy of Engineering policies are students and their welfare, next are the employees and the society at large. MIT Academy of Engineering's policy to all its employees is based on mutual trust and a winwin approach with no area for settling any personal vendetta. Fair employee policies ensure a proper work culture, proper competency mapping and improved performance by employees Our policy for career development and promotional avenues for employees has led to deputation of employees for higher studies and timely promotions and increments that are linked to a biannual performance appraisal based on student feedback, departmental performance, initiatives undertaken, technical skill enhancement, research contribution and team working capabilities. Employees are encouraged to have an interaction with outside world in their domain both at the international and national level through financial support in paper publishing, patent filing, attending seminars, STTPs, workshops, QIPs and Professional body membership. A welldefined Welfare scheme is there for all financial and other support from the institute. Addition to it, there is Group Health Insurance policy for employees along with their family members. Our training and development policy is not only aimed at skill enhancement of an employee but also to help the employee for promotion and to take on higher responsibilities. This policy helps the management to promote the staff and help in bringing about healthy competition among different employees. To promote the training and development of employees, RD projects and IndustryInstitute Interaction opportunities are facilitated, industrial visits, guest lectures and subject experts sessions are held on a regular basis. Employees are also deputed for trainings frequently both within and outside the institute and a record of the same is maintained in their personal file. Merit Scholarship The deserving and needy students of at MIT Academy of Engineering have been fortunate in receiving excellent support from

the Management by providing help to the deserving and needy students through this scholarship. The Needy and poor deserving meritorious students are rendered all possible help in the form of concession in fees. This scholarship is available for all students subject to the fulfillment of eligibility criteria specified by the respective authorities. The Head of the department scrutinizes the form, shortlists the students and forwards the list of shortlisted students along with the recommendation to the Head of the Institute. The shortlisted students are interviewed by a Panel, Chaired by the Head of the Institute. The panel consists of head of various departments. Concessions upto 15 of the fees are extended to the students subject to the recommendation of the committee. Minimum 01 student from each department is recommended under this scholarship scheme every year. Average 1015 students avail the benefit of Merit scholarship in their fees.

Upload details of two best practices successfully implemented by the institution as per NAAC format in your institution website, provide the link

7.3 – Institutional Distinctiveness

7.3.1 – Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust in not more than 500 words

In continuation of strengthening the established quality parameters, MITAOE successfully completed the transition audit of ISO from ISO 9001:2008 to ISO 9001:2015. Skill development courses were made available for students of T Y B.Tech. who obtained skills in these courses relevant to their respective core field of study. Project based learning gave an industry relevant exposure to students which immensely helped them in the application of their conceptual understanding attained in classrooms to solve real life problems. The credit based internship helped students in realizing the completion of their course along with acquiring work life exposure at various organizations. Various clubs of MITAOE impart liberal education for the students. The Cultural club, Sports club, Technical clubs, literary club, and many recreational clubs empower our students and prepare them to deal with complexity, diversity, and change. There are 23 clubs in MITAOE. It provides students with a broad knowledge of the wider world such as science, art, culture, and society. Each club is a skill centered for a specific domain. It allows enhancing skills and in depth study in a specific area of interest. All club activities of MITAOE help students to develop a sense of social responsibility as well as strong and transferable intellectual and practical skills such as communication, analytical and problem solving skills, and a demonstrated ability to apply knowledge and skills in real world settings. From time to time, the club focuses on organizing a rich and diverse array of activities such as debates, speech competitions, group discussions, poetry writing and recitation, short story writing, quiz contests, interactive/lecture sessions, project competitions, workshops, hackathons, sports competitions, etc. Through the publication of Student Magazine 'Ajaanvruksha' tries to inculcate the literary habit and reach out to language and literature lovers and try to create a space for sharing emotions and thoughts. As work does not happen in a vacuum, engineers have to communicate on a daily basis with each other, supervisors, people in different departments, and even with clients. Good communication skills, leadership skills, interpersonal communication skills are important pillars of personality, which help them to reflect what they think in a proper and apt manner.

8.Future Plans of Actions for Next Academic Year

Smart Green and ICT enabled Campus is planned to provide a centralized framework that links systems and make it easy to identify limitations, problems, and opportunities to do things better and better. It will track students experiences and monitors campus efficiency to enhance learning and improve institutional operations. New experiences like these engage students more deeply in campus life. They will position the institute as a stateoftheart environment—the kind that students, faculty, and researchers want to be part of. It would lead to being paperless using the ERP based system. ICT tools will be prompted at a large scale. The IndustryInstituteInteraction will provide a platform for both the students as well as faculty members to be aware of industry expectations of skill sets required for students. This will enables students to be aware of the lacunae in their skills and provides an opportunity to upgrade them. Hence, every Academic School will be asked for signing at least two MoU per program with the reputed companies during every semester. To bring the efficiency and effectiveness in the exam system, the institute has planned to install the digital evaluation system. It will enable evaluators to mark a scanned script or online response on the computer screen itself, rather than on paper. This results in the reduced threat of errors and malpractices, thus, improving the accuracy of the evaluation process. Filing patents and their publication has greater prominence in the institutes nowadays. These will be the document published to contribute to the advancement of knowledge in institutional as well as a scientific field. This will help increase an academic excellence globally. Since the entrepreneurship Development Cell is growing at our institute, the focus will be given on creating startups. It will lead to a healthy ecosystem for Entrepreneurship and innovation. A product audit will help our organization identify any nonconformity in our products and identify the correct measures to fixing them up. In view of this the Academic departments will carry out product audit other than an academic audit. The Faculty training and development center is on the cards. The institute being ISO certified will focus on Identification of Training Needs as per the Competency Matrix. The students will be given more platforms to participate in curricular, extracurricular events at national and international level. The Institute plans to enhance students participation globally through improved club activities. The students and faculty exchange program will be implemented through improved industryinstitute interaction and global linking Institute plans. It will help promote exchange programs with foreign universities. Considering the current trends and dynamic revolution in the industries, the institute has decided to revise the curriculum as per the needs. From the next academic year, the entire curriculum will be revised in to the skillbased curriculum. The cadre ratio for faculty will be improved by motivating on roll faculty to register for Ph.D. Those who are already registered, the institute would support them to complete their research work.
