## **4. Background:-**

TED is a nonprofit organization devoted to “Ideas Worth Spreading”. It started out (in 1984) as a conference bringing together people from three worlds: Technology, Entertainment, and Design, since then its scope has become even broader. TEDx events consist of TEDTalks videos or a combination of live presenters who spark deep conversations and connections with an audience at a specific venue and region around the globe. The intention is for TEDx organizers to select or invite people with certain ideas, projects or successes they believe are worth spreading to the world.

TEDx events are fully planned and coordinated independently and on a community-by-community basis. Each speaker gets a total of 18 minutes using visual aids if needed, to present their topic or idea, and thereafter the speech is posted on the local TEDx organized event website where people across the globe can tune in for free to listen, comment, be inspired, or challenged by ideas.

### **What you'll find at every TEDx event:**

The content and design of each TEDx event is unique and developed independently, but all TEDx events have several features in common.

- Format: A collection of short carefully prepared talks, demonstrations and performances (live, or TEDTalks videos from TED.com) on a wide range of subjects to foster learning, inspiration and wonder
- Videos: A minimum of two pre-recorded talks from the acclaimed TEDTalks video series
- Bias-Free programming: no commercial, religious or political agenda

## **5. Foreword:-**

Through the journey from strangers to family we faced challenges together, overcame hurdles and made m

"The price of success is hard work, dedication to the job at hand, and the determination that whether we win or lose, we have applied the best of ourselves to the task at hand."

- Vince Lombardi

The journey behind the event was like no other. What started out as a group of students brainstorming creative ideas stands before you today as the fruits of our hard work. ' TEDxMITAOE 21'.

Our theme for the edition of TEDxMITAOE was **Prarambh**, a well thought through culmination of all that we stand today. A TEDx event is a local gathering where live TED-like talks and performances are shared with the community.

Millions of memories. It was an honor to lead such a vibrant and enthusiastic team. As they say no team is complete without great leadership. Dr. Mahesh Goudar (Patron), Mrs. Vaishali Wangikar (Advisor) and Mayuri Pokharna & Nikhil Sardar (Convener) were our main pillars of strength as we went from stage to stage. I take this opportunity to express my gratitude towards them for their exemplary guidance and encouragement throughout. I truly appreciate the efforts taken by our team leaders, Pratik Kale & Niranjana Girhe (Core Team), Shreyash Bhagat (Sponsorship team), Atharv V (Content team), Disha Gole (Design Team), Aditya Birangal (Tech team), and Tanishka Jawrani (Creative team), for making this event a grand success.

I extend my deep sense of appreciation to all my companions, without whom our dreams would have turned into dust, especially to the core team of TEDxMITAOE.

THANKING YOU in anticipation!

## 10. Event Speakers:

### Dr. Abhay Jere

Dr. Abhay Jere is the chief innovation officer at the Ministry of Education. In this talk, Dr. Jere paints the Undergraduate Academic scenario of the Indian youth & explores the untapped potential of the Indian youth. Dr. Abhay Jere stresses how the employability of graduate-level students needs to be turned up by a notch, he goes on to emphasize how innovation in our education system is the need of the hour and stated a few of the innovation projects they carried out that proved to increase the employability of students manifold. He has also mentioned about one MBA program specially designed for those who are interested in entrepreneurship. Abhay Jere is Chief Innovation Officer at the Ministry of Education. He is building Innovation and Entrepreneurship in the Education Institution. He aspires to create an educational atmosphere in which thoughts are not constrained by classroom boundaries and generate really disruptive or out-of-the-box ideas. Due to the rote learning system, we don't have a culture to appreciate or promote new ideas. Due to this we have knowingly or unknowingly killed the creativity of students and the ability to think out of the box. His talk is a step towards reinventing academia with innovative minds and transcending the four-walled barrier to unlock limitless out-of -the-box thinking.
