

### ***7.1.6 Quality audits on environment and energy are regularly undertaken by the institution (5)***

Quality audit is a systematic identification, quantification, recording, reporting, and analysis of various establishments' environmental diversity components. It aims to analyze environmental practices within and outside the concerned sites, which will impact the eco-friendly ambiance. The quality audit can be a valuable tool for a college to determine how and where they are using the most energy, water, and other resources; the college can then consider how to implement changes and make savings. It can create health consciousness and promote environmental awareness, values, and ethics. It provides staff and students a better understanding of Green's impact on campus. Quality audit of an institution has been becoming paramount important for self-assessment of the institution, which reflects the institution's role in mitigating present environmental problems. The college has been putting efforts into keeping the campus environment clean since its inception. The present audit aims to identify, quantify, describe and prioritize the framework of Environment Sustainability in compliance with applicable regulations, policies, and standards.

Quality Audit is a systematic identification, quantification, recording, reporting, and analysis of various establishments' environmental diversity components. It aims to analyze environmental practices within and outside the concerned sites, which will impact the eco-friendly ambiance. The green audit can be a valuable tool for a college to determine how and where they are using the most energy, water, and other resources; the college can then consider how to implement changes and make savings. It can also determine the type and volume of waste, which can be used for a recycling project or to improve the waste minimization plan. It can create health consciousness and promote environmental awareness, values, and ethics. It provides staff and students a better understanding of Green's impact on campus. Suppose self-inquiry is a natural and necessary outgrowth of quality education. In that case, it could also be stated that institutional self-inquiry is a natural and necessary outgrowth of a quality educational institution. Thus the college must evaluate its contributions toward a sustainable future. As environmental sustainability is becoming an increasingly important issue for the nation, higher educational institutions' role in environmental sustainability is more prevalent.

In recent times, the Quality Audit of an institution has been becoming of paramount importance for self-assessment of the institution, which reflects the institution's role in mitigating the present environmental problems. The college has been putting efforts into keeping the campus environment clean since its inception. The present green audit aims to identify, quantify, describe

and prioritize the framework of Environment Sustainability in compliance with applicable regulations, policies, and standards.

The main objectives of carrying out a Quality Audit are:

1. Layout plan of the college
2. Improving environmental standards
3. Reduction and reuse of resources available
4. Financial savings through a reduction in resource use
5. Environmental education through Curriculum
6. Developing environmental ethics and value systems in young minds.

7.1.6.1. The institutional environment and energy initiatives are confirmed through the following

**Responses:**

- 1.Green audit**
- 2. Energy audit**
- 3.Environment audit**
- 4.Clean and green campus recognitions/awards**
- 5. Beyond the campus environmental promotional activities**

**Options:**

- A. Any 4 or all of the above**
- B. Any 3 of the above**
- C. Any 2 of the above**
- D. Any 1of the above**
- E. None of the above**
