Through, The Director, MITAOE Alandi (D), Pune

Subject: Application for Lien of 2-years

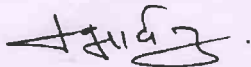

Dear Sir,

I, Manesh Patil have been working as Faculty with Department of Chemical Engineering, since 20th August 2008. During my tenure of over 10 years with the institute, I have worked in various capacities as faculty, mentor and like. The academic and administrative experience gained at the institute has been great.

I have recently been appointed as Registrar of Avantika University, Ujjain from 1st June 2018 for a period of 2-years. In view of this, I herewith request for a lien leave of 2-years from 1st June 2018 to 31st May 2020.

Thanking you in anticipation of a favourable reply.

With warm regards,

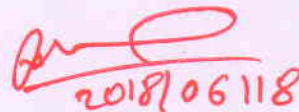

Dr. Manesh Patil

Asst. Prof. (Chemical Engg.)

Subject: Regarding approval for my research work in IIT Bombay.

Respected Sir,

I, undersigned faculty of School of Mechanical and Civil Engineering have registered for my Ph.D. study in IIT Bombay since 1st January 2015 under supervision of Prof. Dr. Rochish Thaokar and Prof. Dr. Yogesh Bhalerao. I will do my research work (both experimental and simulations along with documentary) from Thursday to Sunday in IIT Bombay and will deliver my academic load in our institute on Monday, Tuesday and Wednesday. Kindly avail me the leave from 1st August 2018 for a year till 31st July 2019.

Kindly consider my application and please do the needful.

Thanking You,

Yours sincerely

Regarding Pramod Kothmire

Rochish Thaokar <rochish@che.iitb.ac.in>
To: "Dr. Yogesh Bhalerao" <ybhalerao@maepune.ac.in>

Tue, Jul 24, 2018 at 8:32 PM

Dear Professor Bhalerao

I hope you are in great spirits, and the autonomy is doing wonders to the institute. I am sure, under your stewardship, it will go to new heights.

This mail is regarding the performance of Pramod Kothmire in his Ph.D.. His research work is on "Design Aspects of an Electrocoalescer" under college teacher category since January 2015 under my supervision and you as an External supervisor. The project on which he is working is sponsored by DST and Reliance India Ltd and the project ends early next year. There are several things in Pramod's project which need to be completed before the deadline. The good part is as this work gets done, Pramod gets closer to completing his PhD work. Apart from a few joint publications with you that we are expecting this year, this project has a very high impact on Indian refineries, and we can collaborate in future also. With Pramod we are on good track to make significant contribution to the industry and our joint papers (with you and IIT) will certainly have a good impact.

The works that have been assigned to him are

1) Study on Electric field distribution in Insulated and grounded vessel using comsol simulations so as to extend laboratory studies to commercial desalters. Also to understand the physics between the water separation, volume under electric field and current dynamics w.r.t water chaining. To check the validity of experimental results with simulations.

The status of this work is completed. Manuscript is ready, corrections are given to him, he has to do a little more work. We are expecting submission by August 1st week.

2) Design and development of Trigrid Electrocoalescer (Batch experiments)

Design and fabrication of the set up, Electric field distribution inside the vessel using comsol simulations, Effect of grounding the bottom water on separation efficiency, to get optimum water level kept at the bottom so as to enhance the volume under electric field and to have a caution on safe operation of the coalescer. Effect of increasing frequency on the performance of vessel with the proper intellectual reasoning, Frequency dependency with increasing water cut, how variable frequency helps to increase the efficiency of vessel.

The status of this work is completed. And he has drafted his Manuscript on the above work but not yet corrected from me due to his absence in week days.

3) Continuous Loop Experiments on Trigrid Electrocoalescer

Fabrication of distributor and its complete assembly with set up, pump, oil and water tank, Performance of Trigrid coalescer when operated continuously with the help of positive displacement pump through a distributor for a given residence time, Effective position of distributor in the Electrocoalescer, Water content left in the oil samples taken from the outlet with the help of Karl Fischer, droplet size distribution, CFD investigation on flow distribution inside the vessel so as to validate experimental results.

Fabrication and experiment part he has finished, results are yet to be discussed and expertise of Prof. Juvekar and Prof. Naik is required. Manuscript he will start to write once his results are approved by me and the experts.

4) Design and development of Compact Electrocoalescer (Concentric electrode/Continuous mode)

Design and fabrication of set up, Effect of increasing flow rate on separation efficiency, Single pass vs multi pass results, Karl Fischer to measure the moisture content in the oil sample, Effect of increasing electric field with

in water content, Droplet size distribution, Two stage electro coalescence by assembling the compact coalescer with Trigrid coalescer, CFD investigation so as to study the flow distribution inside the vessel at different flow rates.

He has finish with design and fabrication of the setup. Experiments not yet started. He has to work continuously for getting the good results on the set up.

5) Design of dual polarity and dual frequency Electrocoalescer (Batch and continuous mode)

Comparison of parallel plates and Trigrid electrodes both with the help of comsol and experiments, Design of electrical circuit for dual polarity, Advantages of these technology comparing with others w.r.t to its separation efficiency, ease in operation etc.

He has finish the design, fabrication of set up, comsol simulations but not yet started his experiments, analysis on the same.

6) CFD investigation to suggest best collector and distributor design in Electrocoalescer

To study Frame, Disc and Pipe distributors flow pattern in the coalescer and which one is best among three, Pressure and velocity distribution at inlet and outlet of the vessel, Need of collector in Electrocoalescer, effective design of collector so as to feed the vessel with equal flow rates through all the nozzles without any back pressure.

He had not started with the simulations.

All the above six problems are very much important and will be part of his Thesis and each problem with proper solution will help him to publish one manuscript. In the last one year or more, Pramod works only on Saturday and Sunday, around 60% of time goes in assembly and getting steady state. This has led to sever problems in reproducing his results on the setup. Due to his absence in week days it becomes difficult to communicate and approach. This has badly affected his project and publications.

As a part of our research work and your leading role in his Ph.D. **this is to very earnestly and humbly request you to grant him a study leave for one year, four days a week for his research work.** If he works at least 4 days continuously in a week in IITB, he should be able to finish his remaining experiments and simulations and will focus on writing his manuscript and Thesis. Also the experts Prof. Juvekar and Prof. Naik will retire by December, and their help is critical to the success of his PhD work.

You can ofcourse assign him his academic load in your institute for three days in a week.

This is to request you again Professor Bhalerao to kindly allow Pramod a one year leave so that hsi work gets completed.

Regards

Sub: Request to grant 'Unpaid Lien' for the period of 4 years for Ph.D. in Finland.

Respected Sir,

I Saurabh Deo, Employee ID: 673, is working as an Assistant Professor in the School of Mechanical and Civil Engineering in Mechanical engineering department from June 2014. I have procured Ph.D. admission in **Aalto University, Finland**. Doctoral studies are starting from 1st September 2018.

I have served MIT AOE for 4 years and after completion of Ph.D. I wish to join MIT Academy of Engineering again. I wish to contribute to MIT AOE with international experience I will obtain during Ph.D. tenure for the further growth of this prestigious institute.

It is my humble request, please allow me Unpaid Lien for the Tenure of Ph.D. which is approximately 4 years, from **1st September 2018 to 1st September 2022**. For your kind reference, I have attached Admission letter and Invitation letter from Aalto University.

I also request you to relieve me from duties for my doctoral work on 31st August 2018 after office hours. Kindly consider my request.

Thank You.

To
The Director
MIT Academy of Engineering,
Alandi, Pune
DT: 8th August 2022

Sub: Request about extending (Unpaid) lien vacation to continue doctoral education at Aalto University, Finland.

Dear Sir,

I, Saurabh Deo have been part MIT academy of engineering (MIT AOE) since June 2014. I was working in the department of mechanical engineering as an assistant professor. I was granted unpaid lien vacation to pursue higher education in the Design Factory, at Aalto University, (ADF) Finland from September 2018- August 2022.

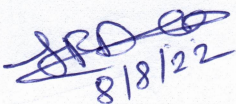

Since 2018, on several occasions, I was able to support collaboration between the ADF and MIT AOE in the form of Design factory representative's visit to MIT AOE, arranging expert training by MIT AOE staff for the Universities of the future project students, Faculty training at MIT AOE by professors from Aalto university, several research articles have been published and are in progress.

Due to the impact of COVID, my role shifted from being a full-time doctoral researcher to getting involved in several international projects (Nordenhub, Universities of the Future, OECD's Project on creativity and critical thinking, Design factory global network) in different capacities. I am also involved in teaching several courses at Aalto University equal to a lecturer. Unfortunately, because of this, I have switched to part time doctoral studies and need more time to earn my doctoral degree.

Working at the Aalto University is helping me built international relations in 30+ countries. I am confident in adding value to MIT AOE in the future too. I genuinely wish to continue working for of MIT AOE and bring all my international experience.

It my humble request, please consider extending my (Unpaid) lien vacation for 2-3 years to continue my doctoral studies at Aalto University. Meanwhile, I will continue supporting MIT AOE in several institute, faculty and student development related activities to best of my abilities.

Thank you.

Recipient

How to Fix It

The address may be misspelled or may not exist. Try one or more of the following:

- Send the message again following these steps: In Outlook, open this non-delivery report (NDR) and choose **Send Again** from the Report ribbon. In Outlook on the web, select this NDR, then select the link "**To send this message again, click here.**" Then delete and retype the entire recipient address. If prompted with an Auto-Complete List suggestion don't select it. After typing the complete address, click **Send**.
- Contact the recipient (by phone, for example) to check that the address exists and is correct.
- The recipient may have set up email forwarding to an incorrect address. Ask them to check that any forwarding they've set up is working correctly.
- Clear the recipient Auto-Complete List in Outlook or Outlook on the web by following the steps in this article: Fix email delivery issues for error code 5.1.10 in Office 365, and then send the

message again. Retype the entire recipient address before selecting **Send**.

If the problem continues, forward this message to your email admin. If you're an email admin, refer to the **More Info for Email Admins** section below.

Was this helpful? Send feedback to Microsoft.

More Info for Email Admins

Status code: 550 5.1.10

This error occurs because the sender sent a message to an email address hosted by Office 365 but the address is incorrect or doesn't exist at the destination domain. The error is reported by the recipient domain's email server, but most often it must be fixed by the person who sent the message. If the steps in the **How to Fix It** section above don't fix the problem, and you're the email admin for the recipient, try one or more of the following:

The email address exists and is correct - Confirm that the recipient address exists, is correct, and is accepting messages.

Synchronize your directories - If you have a hybrid environment and are using directory synchronization make sure the recipient's email address is synced correctly in both Office 365 and in your on-premises directory.

Errant forwarding rule - Check for forwarding rules that aren't behaving as expected. Forwarding can be set up by an admin via mail flow rules or mailbox forwarding address settings, or by the recipient via the Inbox Rules feature.

Recipient has a valid license - Make sure the recipient has an Office 365 license assigned to them. The recipient's email admin can use the Office 365 admin center to assign a license (Users > Active Users > select the recipient > Assigned License > Edit).

Mail flow settings and MX records are not correct - Misconfigured mail flow or MX record settings can cause this error. Check your Office 365 mail flow settings to make sure your domain and any mail flow connectors are set up correctly. Also, work with your domain registrar to make sure the MX records for your domain are configured correctly.

For more information and additional tips to fix this issue, see [Fix email delivery issues](#) for error code 5.1.10 in Office 365.

MIT Academy Of Engineering Mail - Resignation & Lien leave application

Vipul,

If possible add this sentence in Lien application that I will use MITAOE affiliation in all my research & Publications during the lien period.
Sorry for the late reply from my side due to the weekend. I think Usha madam will ask for same.

Thank You,

Dear Sir/Madam,

9/2/2020

MIT Academy Of Engineering Mail - Resignation & Lien leave application

This is to inform that if we consider his lien application then we can not take 1 months gross salary from him as per our policy. We will have to release all his pending salaries after completion of all NO DUES formalities.

I had discussion with accounts dept in this regard that time they said that they need this through email that his lien is approved so they can go ahead further with NO DUES formalities of accounts department.

Subject: Regarding permission for availing lien leave for PhD at SVNIT Surat

Through: Dean, Civil Engineering

Respected sir,

I am glad to inform you that I have been selected for final admission for PhD (A.Y. 2022-23) under the QIP scheme at S.V. National Institute of Technology, Surat. I am thankful to you, for providing me with a No Objection Certificate for QIP PhD program & opportunity vide letter no. MITAOE/FSA/HR/8657/2021 dated 15th March 2021.

For successfully completing PhD, through this application, I am requesting for lien leave (unpaid) for the period of 3 years starting from 1st August 2022 & kindly provide me relieving certificate in the attached format.

As per earlier declarations submitted, I will follow the institute guidelines during my PhD work & will resume my duties soon after the completion of course.

Thanking you,

Yours faithfully,

Mr. Atif B Shaikh
Assistant Professor,

School of Mechanical & Civil Engineering
