MIT Academy of Engineering (An Autonomous Institute Affiliated to Savitribai Phule University)	**Aptitue Training – B.Tech. Guru: Functional Grammar Course Report**	
Alandi (D), Pune – 412105	**ACADEMIC YEAR**	**2021 – 2022**
SCHOOL OF CHEMICAL ENGG.	**CLASS**	Second Year and Third Year B. Tech
Starting Date of Course: 01/07/2021		
Topic	Functional Grammar Development	
Name of Faculty Coordinator	Mr. S.S. Gandhi	
Duration of Course	80 Hours	
Number of Students Participated	1040 (From all branches)	

Details of Course:

The main objective of this coure is to develop awareness about functional grammar and aptitude development among students.

During this course, students are assigned with various tasks related to:
Functional Grammar
Gramatical mistakes and sentence framing
Day-to-day communications
Communication barriers
Grammar and paragraph reading aspects of aptitude test

Students are evaluated critically based on these activites and then conclusive remarks as well as corrective actions are suggested to them.

Details of Course:

The main objective of this course is to increase students confidence level during day to day communication, to enhance their public speaking skills and to develop leadership qualities amongst them.

During this course, students are assigned with various activities which are as follows:

- Role plays and picture description
- Creative writing and presentation skills
- Voice modulation activities
- Leadership development activities
- Decision making activities
- Time management activities

Students are evaluated critically based on these activites and then conclusive remarks as well as corrective actions are suggested to them.

Auto Sports Club Report

What is BAJA?

Baja SAE is an intercollegiate design competition run by the Society of Automotive Engineers (SAE). Teams of students from universities all over the world design and build small off-road cars. The cars all have engines of the same specifications. As of 2023 the engine has been an unmodified Briggs & Stratton Model 19 Vanguard engine single-cylinder with a displacement of 305cc and power output of approximately 10 bhp (7.5 kW).

The goal in Baja SAE racing is to design, build and race off-road vehicles that can withstand the harshest elements of rough terrain. The vehicles used in Baja SAE racing are often similar in appearance to dune buggies. Before 2007, the events were called "Mini Baja."

Each year as many as 141 Baja cars are entered in the Baja SAE events across the US and around the world where events are held including India, China, Brazil, South Africa and Korea. In India, this event is run by SAE India. In China, this event is run by SAE China starting in 2015. All cars must adhere to SAE's rules, and pass SAE's technical inspection and judging; a car may not race until all safety inspections are passed. Small engine manufacturer Briggs & Stratton sponsors Baja SAE teams by providing the SAE sanctioned engine free of charge, at a replacement rate of one engine for every two years in competition.

There are multiple dynamic events, usually four per event, as well as a single four-hour endurance race. The dynamic events include hill climbs, sled pulls, manoeuvrability events, rock crawls, and suspension & traction events. Previously the cars had to be able to float and propel itself on water under its own power. This was changed from the 2012 competitions onward due to safety concerns.

Static events, such as written reports, presentations and design evaluations are provided by participating teams. This is when the teams are judged on ergonomics, functionality, and producibility of their cars; ensuring that the final placement of the team does not rest solely on the vehicle's performance but rather on a combination of static and dynamic events. Required reports detail the engineering and design process that was used in developing each system of the team's vehicle, supported with sound engineering principles.

Also, a cost report that provides all the background information necessary to verify the vehicle's actual cost is used to rate the most economically feasible for production. These reports are submitted weeks in advance of each event, where the presentations and design evaluations are given on site in the presence of SAE design judges.

About TEAM NIYUDRATH RACING

Team Niyudrath, MIT AOE's official BAJA racing team, was established in 2012 by a group of aspiring auto enthusiasts. What defines us is our legacy of 11 long years in BAJA racing.

The team has been turning heads at national events since its inception and has won many laurels and awards. Most notable of all, standing 9th AIR in 2023.

For First Year & Second Year Students-

As our new syllabus doesn't consist of Automobile Engineering subject. Hence students can get practical exposure to learn automobile engineering. Student can learn following the industry oriented softwares.

1. CATIA.
2. Autodesk Inventor
3. Autodesk Fusion 360
4. SolidWorks
5. ANSYS
6. Altair Hyperworks
7. Lotus
8. CorelDRAW
9. Adobe Photoshop
10. Adobe Premier Pro

For Third Year & Final Year B.Tech Students-

A golden opportunity to get placed in some Multinational Companies. Those companies will recruit only through on site recruitment at the event. Following are some major recruiters.

1. ANAND Group
2. Mahindra & Mahindra
3. ARAI
4. Cummins
5. Faurecia
6. General Motors
7. Gabriel India Limited
8. Eleation Academy
9. MATLAB & Simulink

Opportunity to carve the Soft Skills

1. Communication Skills
2. Presentation Skills
3. Inventory Management
4. Time Management
5. Team Work
6. Negotiation Skills
7. Organisational Behaviour

BEYOND CURRICULUM

DURATION: 64 to 68 hours hour **TIME:** 6:00 -08:00 pm (Thursday and Friday)

Technical Team Co-ordination Activity: *"10 Days"* What is ***"10 Days"?***

Every year, team participates in National Event BAJA SAEINDIA, which takes place in 3 stages, among which the first and foremost stage is virtual design presentation. For which team must design the entire ATV, for the upcoming event and present it to the panel, the presentation also includes the calculations and considerations done while designing of the vehicle, plan for the season, team structure, etc. Most of the design and the presentations is done by the old members of the team, as they have adequate knowledge and skills for the same and the new members are still getting to know about the team about the event about their respective departments. So, after the completion of the virtual round of the team, it is the tradition of the team that the "10 Days" activity is given to the new members.

So ***"10 Days"*** basically is everything the new members must do that the old members did in the virtual round: **Calculations**, **considerations**, **designing**, **rendering**, **analysis**, **PPT preparation**, **presentation**, etc. It is the task that makes you think Beyond the Curriculum, beyond what you have learnt so far. Considerations according to manufacturing point of view, deep study of manufacturing processes, design considering **manufacturing process and sequence.** It is the task to bring out the best out of you, it's the time you push your limits, test your skills, and boost up your knowledge.

The objective of this activity is not only to inculcate technical skills in the new members, but also to improve team co-ordination and bonding among them. Before that they were focused mostly on their respective departments, but because of this activity to design the entire ATV all the departments must come together, brainstorm together and design the ATV, which meets all the requirements of the rulebook and guidelines of the event and is comfortable and safe for the driver and which can perform good under off-road conditions.

Work structure:

"10 Days": This event is organized for juniors in order to check their knowledge about design and analysis and also their presentation skills. Here the juniors are suppose to complete the work of designing and analysis and also prepare a

presentation in the duration of 10 days. It is a dummy activity resembling the Virtuals BAJA event.

Powertrain: The department initiates the works by taking the input parameters from other department and will conduct the needed calculations. Later, the department makes CAD models and perform analysis of the powertrain components. Later, manufacturing of the department is done.

RC and CAE: The department will take the required mounting points coordinates from the dynamics department and then will prepare a model and perform required analysis on it. Finally proceeding towards the manufacturing.

Suspension and steering: After finalizing the trackwidth and wheelbase, geometries are prepared and finalized on the lotus software. all the clashes and feasibility of the components are checked using CATIA.

Brakes: After acquiring needed data, calculations for various brakes parameters and components dimensions are performed. Later the components like rotors and calipers are prepared in CAD software and assembly of the same is done.

AUTOSPORT CLUB

TEAM NIYUDRATH RACING

We are pleased to announce the commencement of our liberal learning course on autosports at the Team Niyudrath Racing. This course is designed to provide a comprehensive understanding of various aspects of autosports, including designing, manufacturing, technical knowledge, safety procedure and much more.

The course will begin on Wednesday, August 2nd, 2017, and conclude on Thursday, December 7th, 2017. It is scheduled to run for six weeks/66 hours, with classes scheduled for Wednesday, and Thursday evenings from 6:00 pm to 8:00 pm. The venue for the classes will be the Autosports Club premises, and we request all participants to be punctual and regular in attending the classes.

We encourage all our members who have a passion for automobiles to enroll in this course and gain in-depth knowledge. This course is open to members of all ages, and no prior experience in autosports is required.

We look forward to welcoming you to our liberal learning course on autosports.

Thanks and Regards,

Team Niyudrath Racing

Syllabus for design and manufacture of ATV course: -

(A). ROLLCAGE

1:- what is rollcage, types of rollcage, why it is important, what is included in Rollcage 2:- Rules for rollcage
3:- Material selection, bearing selection, Rollcage calculation
4:- Designing of rollcage and it's included parts
5:- analysis of rollcage and parts

(B). BRAKES

1:- What is hydraulic braking system.
2:- Types of hydraulic braking system and components
3:- Brake design methodology
4:- Brake bleeding

(C). Suspension

1:- Theory of suspension
2:- Types of suspension
3:- Suspension point and anti design 4:- Suspension design methodology.
5:- Analysis of Suspension

(D). Steering

1. Wheel alignment
2. Steering geometry and mechanism.
3. Oversteer and understeer
4. Steering linkages and gears

(E). Powertrain

1:- Types of Gears, Gear Designing and Calculations.
2:- Modes of power transmission.
3:- Bearing Selection and Calculations.
4:- CVT ratios and settings.
5:- Design of IC Engine Components. 6:- IC Engine Vs EV case study.

(F). Go green

1:- Exhaust Study
    How engine generates exhaust gases
    Study of all the components of the exhaust system
    Engine Health Indicators
    Emission Norms
    Study of Conventional Catalytic Converters
2:- MSDS (Material Safety and Data Sheet.)
    Selection of the material
    Material Hazards
    Chemical Handling
    Reaction Mechanism
3:- Designing and Analysis
    Cad Designing
    Ansys Flow Analysis of various parameters
4:- Manufacturing Techniques
Selection of Cat-Con material
    Using Different chemical processes on it
    Using different mechanical process on the model to make is durable. Finishing the product

AUTOSPORT CLUB

TEAM NIYUDRATH RACING

We are pleased to announce the commencement of our liberal learning course on autosports at the Team Niyudrath Racing. This course is designed to provide a comprehensive understanding of various aspects of autosports, including designing, manufacturing, technical knowledge, safety procedure and much more.

The course will begin on Wednesday, August 1st, 2018, and conclude on Thursday, November 28th, 2018. It is scheduled to run for six weeks/66 hours, with classes scheduled for Wednesday, and Thursday evenings from 6:00 pm to 8:00 pm. The venue for the classes will be the Autosports Club premises, and we request all participants to be punctual and regular in attending the classes.

We encourage all our members who have a passion for automobiles to enroll in this course and gain in-depth knowledge. This course is open to members of all ages, and no prior experience in autosports is required.

We look forward to welcoming you to our liberal learning course on autosports.

Thanks and Regards,

Team Niyudrath Racing

Syllabus for design and manufacture of ATV course: -

(A). ROLLCAGE

1:- what is rollcage, types of rollcage, why it is important, what is included in Rollcage
2:- Rules for rollcage
3:- Material selection, bearing selection, Rollcage calculation
4:- Designing of rollcage and it's included parts
5:- analysis of rollcage and parts

(B). BRAKES

1:- What is hydraulic braking system.
2:- Types of hydraulic braking system and components
3:- Brake design methodology
4:- Brake bleeding

(C). Suspension

1:- Theory of suspension
2:- Types of suspension
3:- Suspension point and anti design
4:- Suspension design methodology.
5:- Analysis of Suspension

(D). Steering

1. Wheel alignment
2. Steering geometry and mechanism.
3. Oversteer and understeer
4. Steering linkages and gears

(E). Powertrain

1:- Types of Gears, Gear Designing and Calculations.
2:- Modes of power transmission.
3:- Bearing Selection and Calculations.
4:- CVT ratios and settings.
5:- Design of IC Engine Components.
6:- IC Engine Vs EV case study.

(F). Go green

1:- Exhaust Study
    How engine generates exhaust gases
    Study of all the components of the exhaust system
    Engine Health Indicators
    Emission Norms
    Study of Conventional Catalytic Converters
2:- MSDS (Material Safety and Data Sheet.)
    Selection of the material
    Material Hazards
    Chemical Handling
    Reaction Mechanism
3:- Designing and Analysis
    Cad Designing
    Ansys Flow Analysis of various parameters

4:- Manufacturing Techniques

Selection of Cat-Con material

- Using Different chemical processes on it
- Using different mechanical process on the model to make is durable.
- Finishing the product

AUTOSPORT CLUB

TEAM NIYUDRATH RACING

We are pleased to announce the commencement of our liberal learning course on autosports at the Team Niyudrath Racing. This course is designed to provide a comprehensive understanding of various aspects of autosports, including designing, manufacturing, technical knowledge, safety procedure and much more.

The course will begin on Tuesday, August 6th, 2019, and conclude on Tuesday, December 10th, 2019. It is scheduled to run for six weeks/68 hours, with classes scheduled for Tuesday and Wednesday evenings from 6:00 pm to 8:00 pm. The venue for the classes will be the Autosports Club premises, and we request all participants to be punctual and regular in attending the classes.

We encourage all our members who have a passion for automobiles to enroll in this course and gain in-depth knowledge. This course is open to members of all ages, and no prior experience in autosports is required.

We look forward to welcoming you to our liberal learning course on autosports.

Thanks and Regards,
Team Niyudrath Racing

Syllabus for design and manufacture of ATV course: -

(A). ROLLCAGE

1:- what is rollcage, types of rollcage, why it is important, what is included in Rollcage
2:- Rules for rollcage
3:- Material selection, bearing selection, Rollcage calculation
4:- Designing of rollcage and it's included parts
5:- analysis of rollcage and parts

(B). BRAKES

1:- What is hydraulic braking system.
2:- Types of hydraulic braking system and components
3:- Brake design methodology
4:- Brake bleeding

(C). Suspension

1:- Theory of suspension
2:- Types of suspension
3:- Suspension point and anti design
4:- Suspension design methodology.
5:- Analysis of Suspension

(D). Steering

1. Wheel alignment
2. Steering geometry and mechanism.
3. Oversteer and understeer
4. Steering linkages and gears

(E). Powertrain

1:- Types of Gears, Gear Designing and Calculations.
2:- Modes of power transmission.
3:- Bearing Selection and Calculations.
4:- CVT ratios and settings.
5:- Design of IC Engine Components.
6:- IC Engine Vs EV case study.

(F). Go green

1:- Exhaust Study
    How engine generates exhaust gases
    Study of all the components of the exhaust system
    Engine Health Indicators
    Emission Norms
    Study of Conventional Catalytic Converters
2:- MSDS (Material Safety and Data Sheet.)
    Selection of the material
    Material Hazards
    Chemical Handling
    Reaction Mechanism
3:- Designing and Analysis

Cad Designing

Ansys Flow Analysis of various parameters

4:- Manufacturing Techniques

Selection of Cat-Con material

Using Different chemical processes on it

Using different mechanical process on the model to make is durable.

AUTOSPORT CLUB

TEAM NIYUDRATH RACING

We are pleased to announce the commencement of our liberal learning course on autosports at the Team Niyudrath Racing. This course is designed to provide a comprehensive understanding of various aspects of autosports, including designing, manufacturing, technical knowledge, safety procedure and much more.

The course will begin on Tuesday, August 5th, 2020, and conclude on Thursday, December 10th, 2020. It is scheduled to run for six weeks/64 hours, with classes scheduled for Wednesday and Thursday evenings from 6:00 pm to 8:00 pm. The venue for the classes will be the Autosports Club premises, and we request all participants to be punctual and regular in attending the classes.

We encourage all our members who have a passion for automobiles to enroll in this course and gain in-depth knowledge. This course is open to members of all ages, and no prior experience in autosports is required.

We look forward to welcoming you to our liberal learning course on autosports.

Thanks and Regards,

Team Niyudrath Racing

Syllabus for design and manufacture of ATV course: -

(A). ROLLCAGE

1:- what is rollcage, types of rollcage, why it is important, what is included in Rollcage
2:- Rules for rollcage
3:- Material selection, bearing selection, Rollcage calculation
4:- Designing of rollcage and it's included parts
5:- analysis of rollcage and parts

(B). BRAKES

1:- What is hydraulic braking system.
2:- Types of hydraulic braking system and components
3:- Brake design methodology
4:- Brake bleeding

(C). Suspension

1:- Theory of suspension
2:- Types of suspension
3:- Suspension point and anti design 4:-
Suspension design methodology.
5:- Analysis of Suspension

(D). Steering

1. Wheel alignment
2. Steering geometry and mechanism.
3. Oversteer and understeer
4. Steering linkages and gears

(E). Powertrain

1:- Types of Gears, Gear Designing and Calculations.
2:- Modes of power transmission.
3:- Bearing Selection and Calculations.
4:- CVT ratios and settings.
5:- Design of IC Engine Components. 6:-
IC Engine Vs EV case study.

(F). Go green

1:- Exhaust Study
    How engine generates exhaust gases
    Study of all the components of the exhaust system
    Engine Health Indicators
    Emission Norms
    Study of Conventional Catalytic Converters
2:- MSDS (Material Safety and Data Sheet.)
    Selection of the material
    Material Hazards
    Chemical Handling

Reaction Mechanism

3:- Designing and Analysis

Cad Designing

Ansys Flow Analysis of various parameters

4:- Manufacturing Techniques

Selection of Cat-Con material

Using Different chemical processes on it

Using different mechanical process on the model to make is durable. Finishing the product

MIT Academy of Engineering An Autonomous Institute affiliated to Savitribai Phule Pune University		Club Activities Report MITAOE AERO	
Alandi (D), Pune – 412105			
Club Name:	MITAOE Aero	**Academic Year:**	2021-22
Club type:	~~Cultural~~ / technical ~~/recreational/Alumni/sports~~	**Term:**	II

Event Name: RC Plane manufacturing training

Organizing committee: MITAOE Aero club

Manufacturing Phase: 1st April 2022 - 31st July 2022 (Max 4 hour per day – 4 Month duration)

No of Participants: 14 Students

Activity Details of events:

Two planes were manufactured, Regular class and Micro plane with following deails.

Regular class- Dimensions - LWH 172 inches

wing span should not expand beyond two meters

weight limit was 2 to 5 Kg

Micro class - Dimensions - wing span should not expand beyond 1.2 meters

Maximum weight limit was 1.5 kg

The Regular Class team members Anuj Bhaskar, Ritul Chirde, Pramodini Patil, Pooja Khente, Sandeep Kulkarni from TY Mech and Yash Tajane, Smit Ambhore from SY Mech. The Micro Class team members, Harshwardhan Barge (TY ENTC), Amin Sayyed, Divya Chaudhari, Payal Bhatkar from TY Mech and Soham Londhe, Aashish Athavale, Aditya Sanap from SY Mech.

The manufacturing phase of an RC plane involves several steps. The first step is to create a design, which can be done using computer-aided design (CAD) software like Fusion 360, Catia and Solidworks.. Once the design is finalized, the next step is to create a prototype. This can be done using materials such as balsa wood, or aeroply. The CAD Model is then tested for stability, aerodynamics, and overall performance on CFD (Computational Fluid Dynamics) Software like Ansys and SimScal . Once the model has been refined, then the final version of the RC plane is laser cutted. The finished RC plane is then assembled, including the motor, servos, battery, and receiver. Finally, the RC plane is tested to ensure that it is functioning properly and meets the desired specifications.

Major attractions if any:

1. Communication exercises
2. Group Problem-Solving Discussions
3. Leadership development programs
4. Encouraging Positive work relationships
5. Alumn'is sharing their experience

Lacuna /Problems faced during Manufacturing Phase:

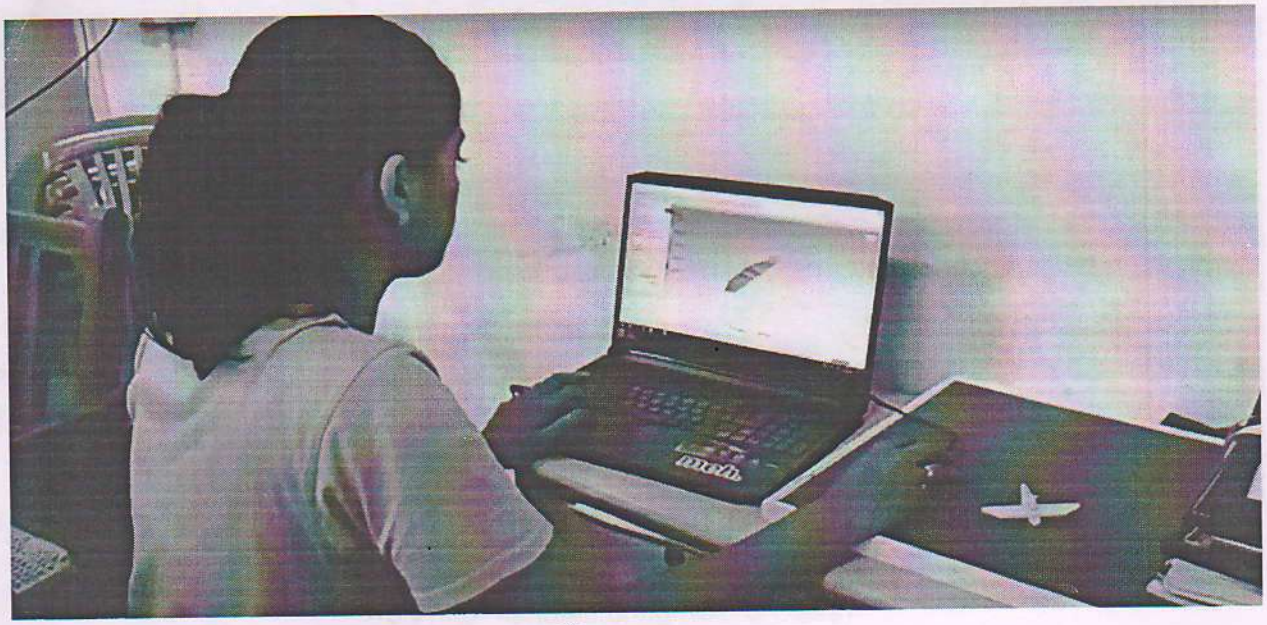
1. Most of the members were inexperienced.
2. We Do not have a large contact datasource.
3. Limited hardware resources
4. Unavailability of Avionics in Indian Markets

Action plan to overcome Problems in future:

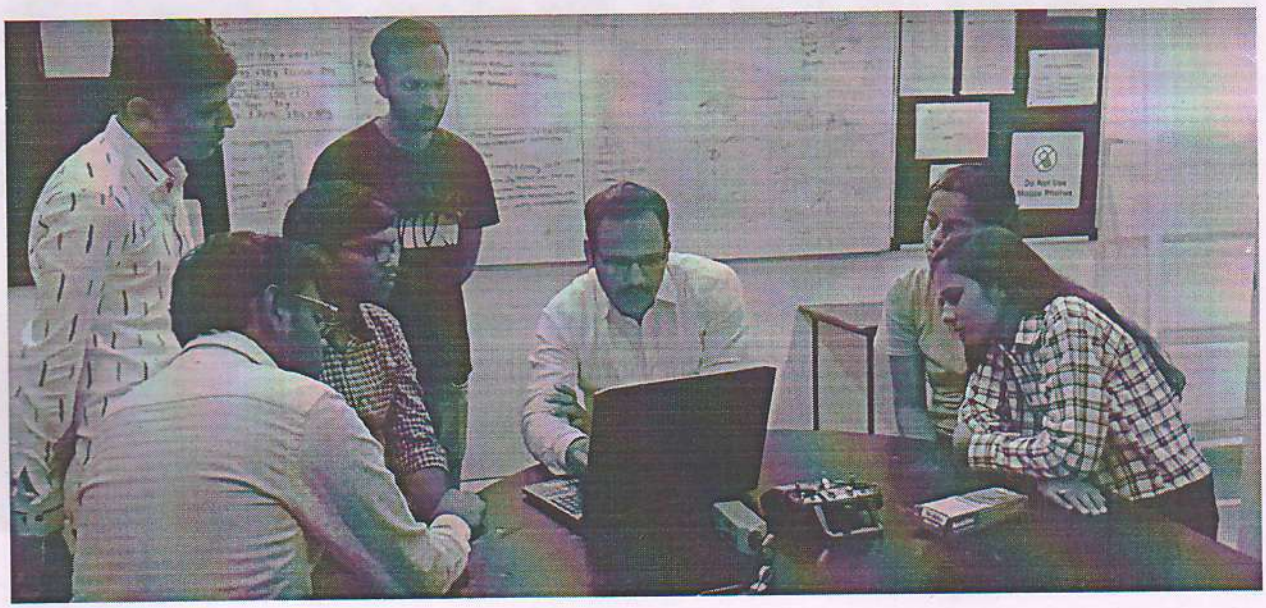
1. Training to be given while recruitment
2. Saved all the contacts.
3. Purchase hardware from Foreign Markets

Photos of event:

1.Team members making the CAD Model



2.Team Member Performing CFD Analysis

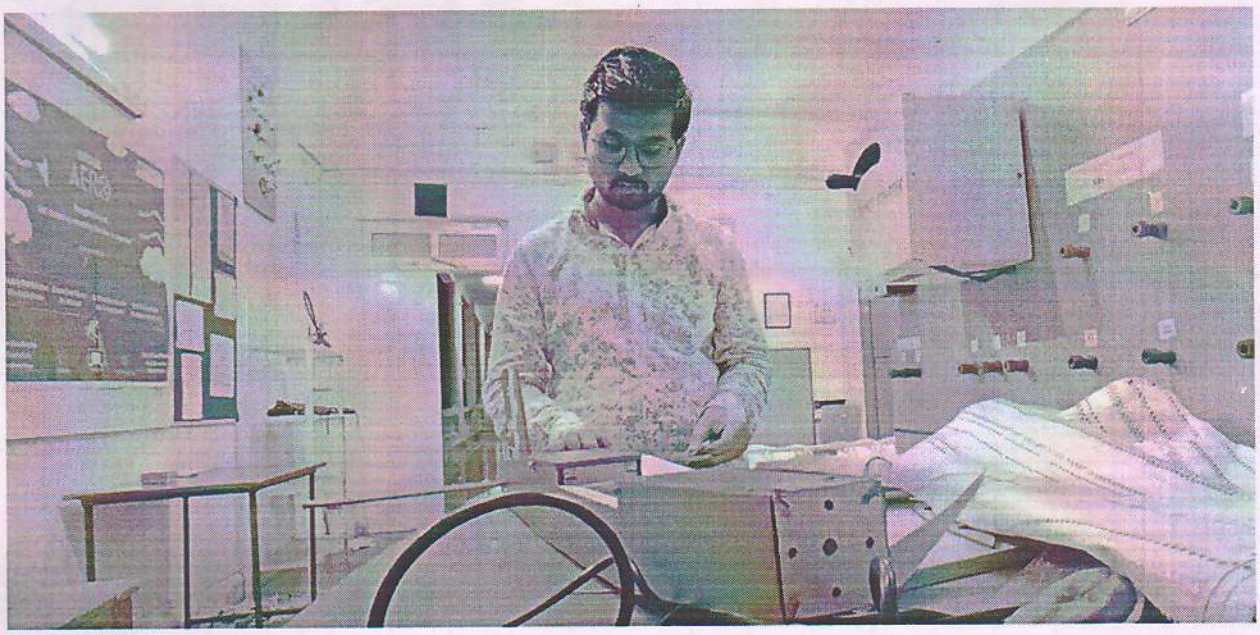


3. Brainstorming

4.Manufacturing Wing (Regular Team)

5. Varnishing Wing (Regular Team)

6.Wing Manufacturing (Micro Class)



8. Fuselage Design(Micro Class)

Sub. : Approval for RC plane Manufacturing Training

Dear Sir,

MITAOE AERO Club is writing to request your approval for conducting an RC Plane manufacturing training session in college, We believe that this training session will be beneficial for the club members and will help to enhance their skills in this field,

We are confident that this training session will help to improve the productivity and efficiency of our club members. It will also help us to meet the growing demand for RC planes in the market. We believe that this training session is a valuable investment in the future of the Club.

We anticipate that the training session will take approximately 4 months (1st April 2022- 31st July 2022) and it will be held at our college premises. The training session will be open to all club members who have an interest in RC Plane manufacturing and wish to improve their skills.

Thank you for your consideration of this request. We look forward to your approval of the training session

Sincerely,

Savita Pawar, Sudesh Powar
